- (2) The nationality mark of the aircraft is the capital letter “M”.
- (3) The nationality mark shall precede the registration mark. The registration mark shall be preceded by a hyphen.
- (4) The registration mark shall be letters, numbers, or a combination of letters and numbers assigned by the Department on the registration of the aircraft.
- (5) The letters shall be capital letters in Roman characters without ornamentation. Numbers shall be Arabic numbers without ornamentation.
- (6) When letters are used for the registration mark, combinations shall not be used which might be confused with the five-letter combinations used in the International Code of Signals, Part II, the three-letter combinations beginning with Q used in the Q Code, and with the distress signal SOS, or other similar urgent signals, for example XXX, PAN and TTT.

2 Location of marks – heavier than air aircraft

- (1) General –
 - (a) The location and measurement of nationality and registration marks on heavier than air aircraft (excluding kites) must be as specified in this paragraph.
 - (b) The nationality and registration marks must be painted on the aircraft, or affixed to the aircraft by any other means ensuring a similar degree of permanence. The marks must be displayed to the best advantage, taking into consideration the constructional features of the aircraft and must be kept clean and visible at all times.
 - (c) The letters and numbers in each separate group of marks must be of equal height.

- (2) Wings —
- (a) The marks must appear once on the lower surface of the wing structure. They must be located on the left half of the lower surface of the wing structure unless they extend across the whole of the lower surface of the wing structure. So far as is possible, the marks shall be located equidistant from the leading and trailing edges of the wings. The tops of the letters and numbers must be toward the leading edge of the wing.
 - (b) The height of the marks on the wings must be at least 50 centimetres.
- (3) Fuselage (or equivalent structure) and vertical tail surfaces —
- (a) The marks must appear either on each side of the fuselage (or equivalent structure) between the wings and the tail surface or on the upper halves of the vertical tail surfaces.  - (d) On rotary wing aircraft where owing to the structure of the aircraft the greatest height practicable for the marks on the side of the fuselage (or equivalent structure) is less than 30 centimetres —
 - (i) the marks must also appear on the lower surface of the fuselage as close to the line of symmetry as practicable;
 - (ii) they must be placed with the tops of the letters towards the nose;
